Service

The little helpers from IBS – essential in maintenance and cleaning – simply brilliant!

100%
IBS – Quality
With Tradition

IBS Scherer persuades for more than 40 years in maintenance, manufacturing and production as a cleaning professional with ecologically friendly complete cleaning solutions for small parts soiled with oil and grease.

Excellent Quality.

We can tell you a lot about quality or we let the others tell. IBS system solutions are in accordance with all German and European standards. This is proved for instance with the GS certification and CE symbol. And what about the cleaning chemicals? Independent expertises verify: safety at work is guaranteed with IBS regarding skin compatibility and air concentration.

Advanced Cleaning Agent.

IBS Special Cleaners are excellent to remove greases and oils. They have excellent creeping properties and undermine and remove even stubborn soiling without any difficulty. They do not damage the surface of the metal parts and there is no metal corrosion.

Starting with the appliance technology through the regenerable cleaning agent up to the internal recycling process – the solution from IBS is always a professional custom sized solution.

IBS Fast-Acting Degreaser **BLITZ** and IBS Fast-Acting Degreaser **BLITZ-Z**

Application Area

Cleans hard to reach parts of metal and machine parts during maintenance and production. Removes grease, oil and resins. Evaporates quickly and leaves no residues. Ideal for the pre-treatment of surfaces prior to painting or gluing.

Application Advantages

Cleaning Efficiency:

Removes oil, grease, resin encrustation, silicones, remaining glue, tar, bitumen – cleaning efficiency due to a high spray pressure

Evaporation: very quickly

Residues: no residues

Metal Corrosion: none

Odour:

- **BLITZ:** mild (generic)
- **BLITZ-Z:** pleasant citron scent

BLITZ: Art.no.: 2050042

BLITZ-Z: Art.no.: 2050205

Sales Units: 12 x 500 ml cans

IBS Fast-Acting Degreaser **TORNADO**

Application Area

Degreasing spray for industrial cleaning (e.g. brake cleaners). Ideal for industry, garages and manufacturing industry etc. No smears or stripes due to slow evaporation. Cleans even hard to reach machine and metal parts.

Application Advantages

Cleaning Efficiency:

Excellent wetting properties, due to a low spray pressure, dissolves and eliminates oil, grease and even resin encrustations.

Evaporation:

- Balanced evaporation after an optimal penetration time. Minimal loss during spraying, optimum wetting of soiled surfaces
- Significantly reduced pollution of the breathable air comparing to the conventional break cleaner and cleaning benzene.

Residues: no residues

Odour: very mild

Metal Corrosion: none

Special properties:

- excellent yield because of carbonic acid

Art.no.: 2050043

Sales Units: 12 x 500 ml cans

IBS-Foam-Cleaner **EasyClean**

Application Area

A highly efficient cleaning agent for general use. Cleans quickly and gentle. Cleans easily all metal, glass, chrome, rubber and plastic parts. Cleans gently any plastic, painted or polished surfaces.

Application Advantages

Cleaning Effect:

- Removes even stubborn soiling like grease, oilstains and tarstains
- Very good foam adhesion power – even if used upside down

Residual:

- Textiles: no stains and dirty
- Glass: no stripes

Odour:

- fruity

Art.no.: 2050020

Sales Units: 12 x 500 ml cans

IBS **MultiFix** Maintenance Spray

Application Area

MultiFix is an all-purpose high-efficient spray. After short time of penetration dissolves blocked linkages due to rust and cleans with a temporary corrosion protection. Ideal lubricant for all moving parts.

Special Properties:

- After short time of penetration blocked parts and linkages due to rust can easily be detached
- MultiFix is an ideal lubricant for all moving parts due to its high creep resistance
- Industrial spray head with ball valve and extended nozzle

Application Advantages

Cleaning Efficiency:

- MultiFix dissolves and eliminates rust, grease and oil soiling due to high penetration properties

Corrosion Protection:

- High-quality special additives prevent new corrosion in the long term.

Odour:

- vanilla odour

Art.no.: 2050044

Sales Units: 12 x 500 ml cans

IBS-Adhesive-Gel **EasyFlow**

Application Area

The IBS-Adhesive-Gel EasyFlow (Spray) can be used where common lubricants fail.

Application Advantages

- excellent creeping properties but not dripping
- can be used upside down – gel cannot drain off
- dust and water resistant, antistatic effect
- ideal for use against adhesive and lube oils, universal and battery grease
- free of grease

Multiple Application

For use in lifts, elevators, conveyors, gaskets, armatures, rods, sliding rails, chains, gears, casters, cables, locks and hinges, wood-working and paper processing...

Essential for using in sight fields where lubricating effect and absolute cleanliness is required.

Art.no.: 2050245

Sales Units: 12 x 500 ml cans

IBS-Adhesive-Grease-Spray white **ActiLub**

Application Area

The IBS-Adhesive-Grease-Spray white ActiLub can be used as a marking spray, as a grease lubrication and long term lubrication for cars and also in all kinds of service stations and garages

Multiple Application

Ideal for lubrication of newels, hinges, machines guides in car industry or transportation engineering, in shipping industry and also for building and farm machinery.

Application Advantages

- ideal for fat lubrication for highly loaded bearings, newels and machine guides

- double lubrication effect – longer intervals for long term lubrication
- visible control – permanent marking is possible because of the white dye
- very adhesive – because of special additives
- excellent creeping properties, gets into hard to reach parts and crevices
- rust protection
- cuts maintenance and lubricant costs by reducing of downtimes and maintenance

Art.no.: 2050246

Sales Units: 12 x 500 ml cans

IBS-Chain-Spray **VivaLub**

Application Area

The IBS-Chain-Spray VivaLub is especially designed for using as a permanent inside and outside lubrication of fast and slowly running drive elements.

Multiple Application

Ideal for excessive used bicycle and motorcycle chains, toothed gear, worm gear, joints, casters, ball bearing, coupling and clutches.

Application Advantages

- synthetic lubricant – no resinification
- intensive long term inside and outside lubrication for different drive elements without regreasing device
- extremely high adhesive power – because of special additives
- excellent creeping properties, gets into hard to reach places and crevices
- protection of chains and cables etc. and protects from any wear
- temperature resistant from -30°C to 150°C

Art.no.: 2050247

Sales Units: 12 x 500 ml cans
